National Aeronautics and Space Administration. RESPONSE OF A HELICOPTER ROTOR TO AN INCREASE IN COLLECTIVE PITCH FOR THE CASE OF VERTICAL FLIGHT. (Réponse d'un rotor d'hélicoptère a une augmentation du pas général dans le cas du vol vertical.) Jean Rebont, Jacques Valensi, and Jean Soulez-Larivière. January 1961. 20p. OTS price, $0.50.
(NASA TECHNICAL TRANSLATION F-55. Translation from Technique et Science Aeronautiques, no. 3, May-June 1959, p. 177-183 (France))

A theoretical analysis, considering unsteady effects, shows that the response to collective pitch while in descending flight is largely dependent upon the rapidity of control application. Experimental tests confirm the theoretical results.
